PROFESSIONAL SUMMARY

Full-stack product engineer who ships end-to-end — from greenfield features to infrastructure overhauls. Proven track record with React/Next.js, Node.js, Python backends, AI integrations (OpenAI, Claude, Gemini), and third-party services (Stripe, Wise, BetterStack).

EXPERIENCE

- **Make** Prague, Czech Republic
Software Engineer Feb 2026 – Present
 - **Pricing API Decoupling:** Extracting an internal pricing API misused by the public marketing site into a dedicated public endpoint, decoupling deployments and eliminating cross-team release blockers
 - **Wise Integration Refactor:** Refactoring Wise payout integration handling thousands of weekly transactions, eliminating recurring data reconciliation errors by hardening the payment data pipeline
- **Appier** Taipei, Taiwan
Software Engineer Jul 2024 – Feb 2026
 - **Campaign Segment Configuration:** Solely owned a greenfield feature end-to-end (frontend + auth backend), unifying two products' segment controls into a single dashboard
 - **Enterprise Billing Platform:** Built a full-stack billing interface on Stripe API, replacing manual per-customer operations with a unified enterprise workflow
 - **Infrastructure Modernization:** Led migration from Yarn/Lerna to pnpm/NX, cutting CI/CD pipeline time by 83% (30 min → 5 min)
 - **Observability:** Integrated LogRocket for session replay and performance monitoring, accelerating issue resolution by 15%
- Software Engineer Intern* Jul 2023 – Jul 2024
 - **Performance Optimization:** Reduced mission-critical page load time from unresponsive to 100ms
 - **Build System Migration:** Migrated Webpack to Rspack, achieving 10x faster builds and accelerating the entire shipping pipeline
 - **Design System Upgrade:** Led design system major version upgrade across 21 apps and 4 teams in a monorepo, coordinating breaking changes with zero downtime
- **Binance** Taipei, Taiwan
Software Engineer Intern Jan 2024 – Mar 2024
 - **SQL Analysis Dashboard:** Built an internal SQL analysis dashboard providing query performance insights for engineering teams
- **LangLive** Taipei, Taiwan
Software Engineer Jun 2022 – Jun 2023
 - **WebGL Animation System:** Rewrote gift animation system in WebGL, cutting CPU usage by 30% during live streams
 - **Data Fetching Architecture:** Re-architected data fetching layer, reducing API calls by 50% and improving page load speed
 - **End-to-End Testing:** Implemented Playwright E2E testing across 3 products, reducing production incidents

PROJECTS

- **DemoDone (demodone.app):** Built an AI SaaS that turns screen recordings into polished demo videos with vision-generated scripts, natural voiceover, animated captions, smart pacing, and export workflows
- **JobBeacon (jobbeacon.app):** Built a job-alert product that monitors company career pages, matches new roles against user-defined keywords and locations, and sends email notifications
- **Replier (usereplier.com):** Built a lightweight Instagram comment-to-DM automation tool for creators and small brands, including keyword-triggered saved replies and click tracking
- **TinyInbox (tinyinbox.co):** Built a simple website chat widget and support inbox for solo founders, covering visitor messages, threaded replies, conversation closing, and site-level setup

SKILLS

- **Languages:** Python, JavaScript, TypeScript
- **Technologies:** React, Next.js, Node.js, FastAPI, Tailwind CSS, NX, Rspack, pnpm, Docker, Playwright, WebGL, Git
- **Cloud & Services:** GCP, AWS, Stripe API, OpenAI API, Claude API, Gemini API, ElevenLabs API, LogRocket, BetterStack

EDUCATION

- **National Taipei University** New Taipei, Taiwan
Bachelor of Science in Computer Science 2019 – 2024
